

**ENVIRONMENTAL NOTIFICATION:
APPLICATION FOR AN ENVIRONMENTAL AUTHORISATION IN SUPPORT OF AN EXPLORATION RIGHT
APPLICATION FOR HYDROCARBONS, IN THE FREE STATE PROVINCE OF SOUTH AFRICA**

Notice is hereby given in terms of Section 79 of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002, as amended) (MPRDA) and Chapter 4 of the Environmental Impact Assessment Regulations, 2014 (as amended in 2017) (GNR 326) promulgated under the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA)) of an application for an Exploration Right and Environmental Authorisation to explore for hydrocarbons in the Free State Province of South Africa. The application involves an Exploration Right application terms of the MPRDA and an EA application following the NEMA EIA process. The competent authority for the Application is the Petroleum Agency South Africa (PASA), with the Department of Mineral Resources (DMR) and the Department of Environmental Affairs (DEA) acting as Commenting Authorities.

APPLICANT AND BACKGROUND

Western Allen Ridge Gold Mines (Pty) Ltd (Western Allen Ridge) (a subsidiary of White Rivers Exploration (Pty) Ltd) holds a Technical Co-operation Permit (TCP) (PASA Reference No. 12-2-167) over the application area. Desktop studies and preliminary geological models that were performed under the TCP provided positive indications that the target area is prospective. As such, Western Allen Ridge lodged an Exploration Right application to the PASA in June 2020 over the TCP, in order to ascertain if viable hydrocarbon (oil, gas and condensate) deposits exist within the application area. The Exploration Right application has been allocated the reference number: 12/3/363 ER.

PROJECT LOCATION AND DESCRIPTION

The application area covers an aerial extent of 33 605.2929 hectares (ha) in respect of farms properties situated in the Magisterial Districts of Kroonstad and Lindley, in the Free State Province of South Africa.

If approved, exploration will be undertaken in accordance with the Exploration Work Programme as submitted to the PASA. The exploration techniques to be performed during the operations include *inter alia* drilling of four (4) wells. No hydraulic fracturing will be performed as part of the exploration programme. The closure objective is to return the disturbed exploration target areas to their original state.

It is anticipated that the following NEMA listed activities under Listing Notices 1, 2 and 3 of the NEMA EIA Regulations (as amended) will be triggered by this application:

Listing Notice	Description
GNR 327 (of 7 April 2017), Activity 27	Clearance of vegetation for exploration activities (area of between 1 to 20 hectares)
GNR 325 (of 7 April 2017), Activity 18	Exploration for oil, gas and condensate, including associated infrastructure, structures and earthworks
GNR 324 (of 7 April 2017), Activity 12	Clearance of vegetation for exploration activities (area of 300 square metres or more)

ENVIRONMENTAL NOTIFICATION:

APPLICATION FOR AN ENVIRONMENTAL AUTHORISATION IN SUPPORT OF AN EXPLORATION RIGHT APPLICATION FOR HYDROCARBONS, IN THE FREE STATE PROVINCE OF SOUTH AFRICA

Notice is hereby given in terms of Section 79 of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002, as amended) (MPRDA) and Chapter 4 of the Environmental Impact Assessment Regulations, 2014 (as amended in 2017) (GNR 326) promulgated under the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA) of an application for an Exploration Right and Environmental Authorisation to explore for hydrocarbons in the Free State Province of South Africa. The application involves an Exploration Right application in terms of the MPRDA and an EA application following the NEMA EIA process. The competent authority for the Application is the Petroleum Agency South Africa (PASA), with the Department of Mineral Resources (DMR) and the Department of Environmental Affairs (DEA) acting as Commenting Authorities.

APPLICANT AND BACKGROUND

Western Allen Ridge Gold Mines (Pty) Ltd (Western Allen Ridge) (a subsidiary of White Rivers Exploration (Pty) Ltd) holds a Technical Co-operation Permit (TCP) (PASA Reference No. 12-2-167) over the application area. Desktop studies and preliminary geological models that were performed under the TCP provided positive indications that the target area is prospective. As such, Western Allen Ridge lodged an Exploration Right application to the PASA in June 2020 over the TCP, in order to ascertain if viable hydrocarbon (oil, gas and condensate) deposits exist within the application area. The Exploration Right application has been allocated the reference number: 12/3/363 ER.

PROJECT LOCATION AND DESCRIPTION

The application area covers an aerial extent of 33 605,2929 hectares (ha) in respect of farms properties situated in the Magisterial Districts of Kroonstad and Lindley, in the Free State Province of South Africa.

If approved, exploration will be undertaken in accordance with the Exploration Work Programme as submitted to the PASA. The exploration techniques to be performed during the operations include inter alia drilling of four (4) wells. No hydraulic fracturing will be performed as part of the exploration programme. The closure objective is to return the disturbed exploration target areas to their original state.

It is anticipated that the following NEMA listed activities under Listing Notices 1, 2 and 3 of the NEMA EIA Regulations (as amended) will be triggered by this application:

Listing Notice Description	Description
GNR 327 (of 7 April 2017), Activity 27	Clearance of vegetation for exploration activities (area of between 1 to 20 hectares)
GNR 325 (of 7 April 2017), Activity 18	Exploration for oil, gas and condensate, including associated infrastructure, structures and earthworks
GNR 324 (of 7 April 2017), Activity 12	Clearance of vegetation for exploration activities (area of 300 square metres or more)
